STOP HAIDER

NO FASCISTS IN GOVERNMENT

The decision by the Austrian Tories to form a coalition government with the far right Freedom Party led by Jörg Haider has sent shock waves across Europe. Haider has made clear his sympathies for Hitler's Nazis, and his party is viciously anti-immigrant. He borrowed the notorious propaganda of Joseph Goebbels using the slogan 'Überfremdung', meaning overpopulation by foreigners.

We welcome the decision by the Israeli government to break all diplomatic links by recalling its ambassador and the decision by other European governments to isolate Austria. Robin Cook finally broke his week long silence today declaring that the coalition should be judged by „deeds not words“. In other words it's acceptable to incite racial hatred but not to carry it out! We must show our solidarity with those protesting in Austria and demand that Britain severs all diplomatic links immediately.
